HOURLY ROLE

POSITION OVERVIEW

Caztek Engineering is an innovative Engineering and Product Development company. We develop products for a wide variety of industries including medical, aerospace, industrial, and consumer markets. We have a dynamic, creative, project-based environment, working on many cutting-edge and new product designs. As a Mechanical Engineer, you will work alongside our experienced team of Industrial Designers, Engineers, Machinists and Product Fabricators to deliver exceptional designs, prototypes and products to our customers.

PRINCIPAL DUTIES & RESPONSIBILITIES

- Creating, modifying and/or documenting CAD models and mechanical drawings
- Modeling components and assemblies in CAD (SolidWorks)
- Mechanical wrenching, basic fabrication, assembly & parts chasing
- Development and capturing of Bills of Materials (BOM)
- Mill and Lathe machining
- CAD Motion Studies
- FEA Analysis
- Welding
- Software Programming
- Electrical schematic creation
