## Fabricator

### FULL-TIME ROLE

#### POSITION OVERVIEW

Caztek Engineering is an innovative Engineering and Product Development company. We develop products for a wide variety of industries including medical, aerospace, industrial, and consumer markets. We have a dynamic, creative, project-based environment, working on many cutting-edge and new product designs. As a Fabricator, you will work alongside our experienced team of Industrial Designers, Engineers, Machinists and Product Fabricators to deliver exceptional designs, prototypes and products to our customers.

#### PRINCIPAL DUTIES & RESPONSIBILITIES

- Weld, fabricate and assemble low to medium volume components and sub-assemblies.
- Layout, fit, weld, and fabricate metal assemblies and weldments including structural welding, and other fabrication processes ensuring quality standards are met.
- Properly read and interpret blueprints and engineering drawings.
- Set-up and operate tools associated with metal fabricating and welding such as Horizontal Band Saw, Vertical Saw, Miter Saw, Sheet Metal (punch/shear/bend), Bench Belt and Disc Sander, Drill Press, Bridgeport Mill, Tube Roller, Tube Bender, and associated power hand tools, both electrical and pneumatic.
- Wire control panels.
- Build industrial automation.
- Work with others to complete deadlines as a team member and is self-motivated to work with minimal supervision as needed.
- Maintain a clean and safe work environment.
- Other duties as assigned.

#### SUPERVISION RECEIVED

Reports to Owner and Engineering team  
Weekly shop meetings to review project status

#### SUPERVISION EXERCISED

None

## **QUALIFICATIONS & SKILLS**
